Jeju island is Korea's most popular tourist resort as well as its most favored honeymoon destination. Known as "Little Hawaii" for its volcanic landscape, picturesque subtropical scenery, sandy beaches, waterfalls and hiking trails, it is one of the world’s top 10 tourist attractions with over 4 million visitors a year.

International Convention Center Jeju (ICC Jeju) is located within the Jungmun Tourist Complex, with the cobalt-blue Northern Pacific stretching to the south and towering Mt. Hallasan commanding the north. Spreading over an area of more than 5,000㎡, the world-class convention center occupies 7 stories above ground. Artfully merging the blessed tourist resources around it with the functionality of a convention facility, this resort-style convention center is fully equipped for international meetings of any scale, and provides professional-grade logistic support for event-hosting. Bring recreation and leisure to your convention; host with ICCJEJU, the world’s top resort-style convention center.
